## Course Description

This course is designed to give users the skills needed to create interactive visualizations using SAP Lumira. Users will also learn how to share the visualizations they create.

The course provides a comprehensive coverage on the rich visualization types available within SAP Lumira. In addition, users learn how to prepare and enhance their data for the visualizations. The course also teaches how to create and use hierarchies in SAP Lumira, including geographic hierarchies that allow you to view and analyze your data on maps.

## Audience

This course is targeted for users that need to create visualizations to analyze their data.

## Objectives

After completing this course, students will be able to create SAP Lumira visualizations using beginner to intermediate level techniques. Students will learn techniques such as importing datasets, preparing and enhancing data, combining datasets, creating charts, crosstabs and filters, using functions to create formulas, create and share stories (dashboards) and much more. The course provides extensive hands on workshops.

**Duration** - 1 Day

**Version** - 1.3x

## Prerequisites

No previous knowledge of SAP Lumira is required. Knowledge of using a Web Browser is required. Prior experience with Microsoft Excel is helpful but not mandatory.
