

Over 30,000 users trained by experienced consultants.

"I appreciate the fact that we were able to easily deviate from the book when possible to cover more interesting & advanced topics. [Instructor] is very knowledgeable and honest about BO XI capabilities. Thanks."
- **John F, FedEx**

"[Instructor] is very knowledgeable in this subject and is able to communicate information in an easy, understandable manner. I look forward to doing the advanced class..."
- **Kimberley G, Rogers Wireless**

"This instructor gets a 10 out of 10. He is brilliant and has the expertise and teaching methodology that makes this type of course fun and educational. Highly recommend for future courses!!! OUTSTANDING!!!!!!!!!!"
- **Attendee, Burger King Corporation**

Audience

Individuals or teams with specific topics requiring customized training and/or needing condensed quality training to get users up to speed.

Duration - 3 Days - Live Classroom

Prerequisites

None

Version - 9.x to 2018.x

Objectives

- Connect to your data
- Edit and save a data source
- Understand Tableau Terminology
- Use the tableau interface/paradigm to effectively create powerful visualizations
- Create basic calculations including basic arithmetic calculations, custom aggregations and ratios, data math, and quick table calculations
- Build advanced chart types and visualizations
- Build complex calculations to manipulate your data
- Use parameters and input controls to give users control over certain values
- Implement advanced geographic mapping techniques and use custom images and geocoding to build spatial visualizations of non-geographic data
- Prep your data for analysis
- Combine data sources using data blending
- Combine multiple tables in the same data source using joins
- Make your visualizations perform as well as possible by using the Data Engine, extracts, and efficient connection methods
- Build better dashboards using techniques for guided analytics, interactive dashboard design, and visual best practices

Trainers who are experienced consultants...Bring real-world expertise to your users.

Topics Covered

- Introduction
- Connecting to data
- Organizing your data
- Slicing your data by date
- Using multiple measures in a view
- Showing the relationship between numerical values
- Viewing specific values
- Working with single data sources
- Using multiple data sources
- Customizing your data
- Using calculations in Tableau
- Analyzing data with quick table calculations
- Advanced table calculations
- Highlighting data with reference lines
- Creating and using parameters
- Mapping data geographically
- Showing breakdowns of the whole
- Comparing measures against a goal
- Defining subsets of your data
- Viewing distributions
- Statistics and forecasting
- Making your views available
